*Commissioned officer (**Captain, Air Force**), including service in IT units of military research and
engineering institutions.*

PERSONAL CODE

- The pursuit of Truth and commitment to following it is, in my view, the purpose of *Homo sapiens* existence. Abandoning self-development and reconciling with one's own flaws marks the end of meaningful human life.
- Humanity, spirituality and integrity are the fundamental qualities that distinguish a person from all other forms of existence.
- Responsibility towards society, fellow citizens, lineage and family. I feel personal gratitude and responsibility towards those who contribute constructively to my development, improvement and life path.
- Conviction that any endeavour must contain a socially beneficial component. I believe that business becomes truly legitimate only when it creates long-term social value, not merely financial outcomes.
- Respect and tact as principles of social interaction. I respect those who have achieved significant life results and have devoted themselves to their chosen cause. I act with tact towards those facing difficult life circumstances.
- Adequate self-assessment: neither self-aggrandisement nor underestimation of one's capabilities, with realism and continuous focus on personal development of both mind and character. I build relationships based on reality, without compromising core personal values.
- Competence and responsibility as fundamental requirements for business partners. I do not accept ignorance or irresponsibility. At all stages of personal development, I exercise deep self-control and continuous self-improvement.
- A sober lifestyle as a personal choice. I remain tolerant towards the different choices of others.

LOCATION IN UKRAINE

My professional and personal life is fully connected with Ukraine. This is where my family, my business, my long-term commitments and my responsibility for results are located. I view international cooperation exclusively as partnership programmes that strengthen Ukraine's institutional capacity, not as trajectories of emigration or relocation.

POLITICAL EXPERIENCE

Participation in the 2019 presidential election campaign as part of the campaign headquarters: design, implementation and coordination of an information and analytical monitoring system for voting processes.

INTERESTS

Water and cycling tourism, angling, windsurfing, clay target shooting, cynology (canine training and breeding).
